Summary

SDE - Full Stack Engineer with **2+ years shipping production Next.js/Node.js applications**, specializing in **performance optimization** (64% load-time reduction) and **AI-integrated** tooling (LangChain RAG pipelines). Comfortable owning features end-to-end, from **UI to database to deployment**.

Experience

InRain Pvt. Ltd.

Jul 2024 - Present

SDE - Full Stack

Delhi

- Built and shipped **4+ production** web applications end-to-end using Next.js and Node.js, serving live users with zero major post-launch incidents.
- Reduced page load time by **64% (2.5s → 890ms)** through server-side rendering (SSR) and SEO optimization, directly improving organic search visibility.
- Engineered automated email workflows via SMTP/Nodemailer, achieving asynchronous transactional user confirmations.
- Designed and deployed an internal RAG pipeline (LangChain, PGVector) that cut manual data search time by **83%**, streamlining the knowledge retrieval for the end user.
- **Tech : Next.js, Node.js, MongoDB, LangChain, PGVector, Material UI, TailwindCSS, Nodemailer**

RK Info Systems

Jan 2024 - May 2024

Software Engineer Intern

Remote

- Built responsive, accessible UI screens across the product, reducing reported UI bugs and improving cross-device usability.
- Integrated Razorpay payment API end-to-end, achieving 100% accuracy in payment capture and retrieval across transactions.
- Refactored components into reusable modules and led code reviews, shortening development turnaround for new features.
- **Tech : React.js, Node.js, Material UI, HTML5, CSS**

Skills

Languages: Javascript, SQL, C, Java

Frontend: React.js, Next.js, React Native (Expo), Redux, TailwindCSS, Bootstrap, Material UI

Backends: Node.js, Express.js, REST API, BullMQ

Database: MySQL, MongoDB, Postgresql, PGVector, Redis

AI/ML Tooling: LangChain, RAG Pipelines

DevOps & Tools: Docker, AWS, GitHub Actions, CI/CD

Coursework: Data Structures & Algorithms, OOP, DBMS

Projects

InRain AI

- **Tech :** Next.js (ISR/SSR), Docker, GitHub Actions, LangChain, PGVector, BullMQ, Redis
- Built a Redis-backed **message queue (BullMQ)** with dedicated Next.js workers to handle thank-you emails, admin notifications, and AI-generated client requirement summaries **asynchronously** — cutting API response time from **~2s to ~90ms (22x faster)** by removing email/AI processing from the request-response cycle.
- Implemented an IP-based Call/WhatsApp click-tracking system with repeat-click deduplication, extending lead visibility beyond form submissions.

XSNAPSTER — E-Commerce Platform

- **Tech :** Next.js (ISR), Redux, TanStack, TailwindCSS, Material UI
- Developed an e-commerce store enabling sellers to register and sell their products via seamless checkout experience.
- Instrumented a **/metrics** endpoint and deployed **Prometheus** via Docker Compose to monitor API health and track successful order completions in real time, enabling proactive validation of checkout reliability.
- Optimized **Redux store** by removing unnecessary state updates and restructuring components.

Education

Institute of Technology and Science

Master of Computer Application

Oct 2022 - June 2024

Ghaziabad, Uttar Pradesh

- **Relevant Coursework:** Data Structures and Algorithms (Java), HTML, CSS, JavaScript

Achievements

- Ranked in the top 3 teams at a college-organized hackathon, showcasing adept problem-solving and teamwork skills.
- Freetime freelance photographer renowned for collaborating with premier studios across Uttar Pradesh. Recognized for delivering exceptional results, garnering high praise and appreciation.
